Tel: 720.956.2171

The purpose of the refugee health education resource center is to offer health education materials, connect patients with resources, and assist with health related questions and documents. We are open Monday through Friday from 8am-5pm. Please always bring a picture ID and medical insurance card (if available) when coming to the resource center.

Services we assist clients with:

1. Green card documents: Must have been in the United States for at least 11 months to fill out the forms. Please allow up to two weeks for us to complete list of needed shots.

2. General information on immunizations: Where to go? Vaccines for school? How much do they cost?

- 3. Appointment information:
 Many clients receive messages regarding health appointments in English. If they are uncertain about the location, time, and date of an appointment, they can come here for clarification and directions.
- 4. Health Education material: We have a variety of education pamphlets in the native language of the client. If clients are looking to understand their own health conditions and learn about prevention, we can provide them with material to take home.

<u>5. Connecting patients with community</u>
<u>health centers</u>: We can provide maps and
information to the community health center
located closest to the client's house.

6. Woman's Care: We have information about where to go for family planning, pregnancy tests, and general woman's care.

7. Insurance Questions: We can check to see the status of a client's Medicaid; also we have information about other health program options if a client is no longer eligible for Medicaid.

8. Connecting patients with community health resources: We are currently creating partnerships with other health organizations in the city. If you have a client with a special need, please contact us and we may be able to connect them with an outside resource.
